Angular Escalable

Arquitectura de software para grandes aplicaciones

No todos los proyectos son iguales

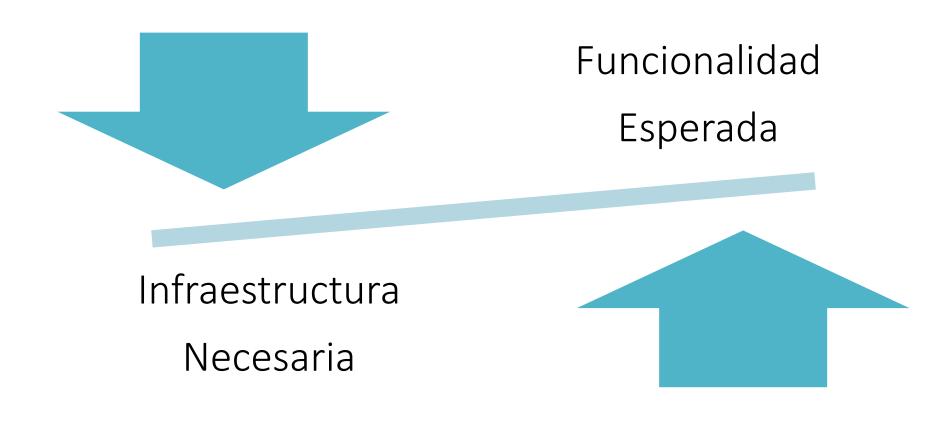

Tu arquitectura

WHY >>> what

Architectural Decision Record.

El software también es Coste / Beneficio

Restricciones y precondiciones

Angular

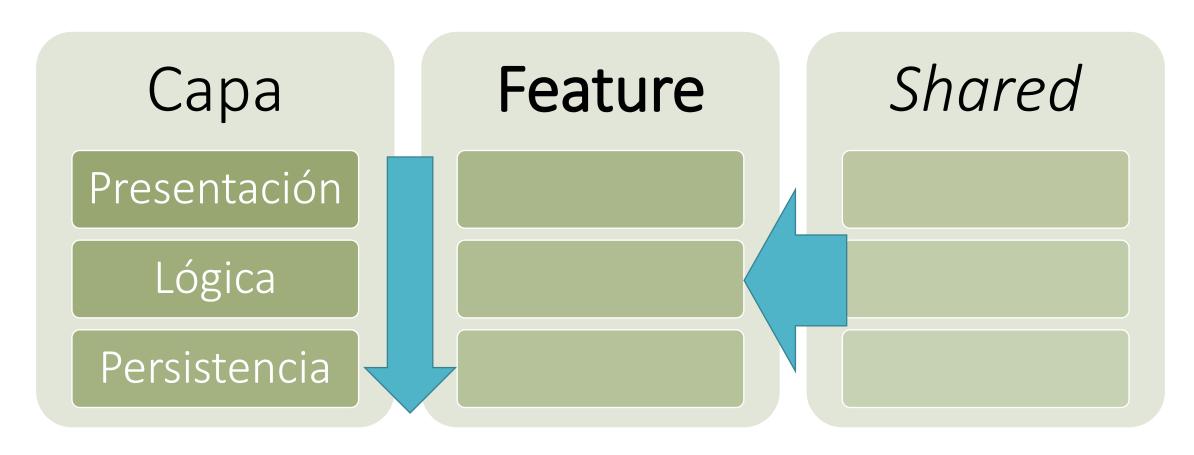

Duradera >2y

Equipos >2dev

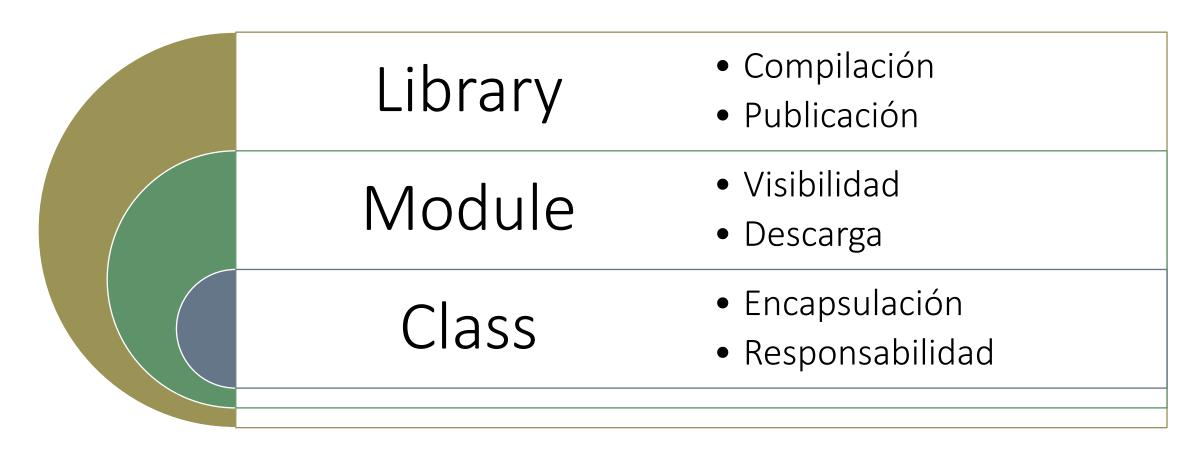

Gran funcionalidad

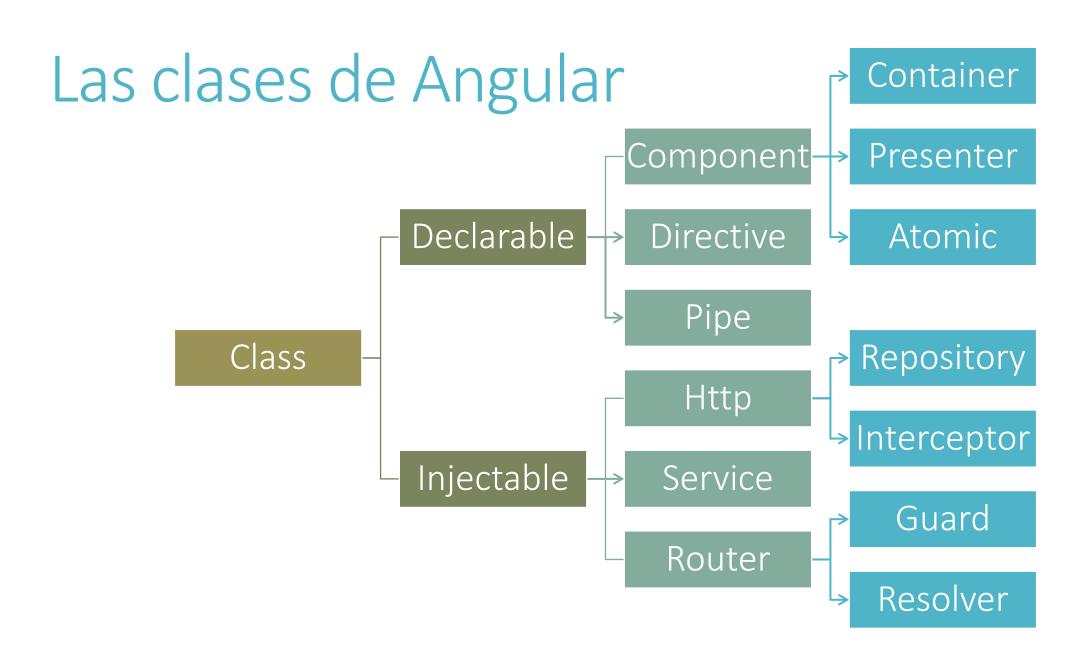

El código lógico

El código físico

El código lógico de Angular

Presentación

Lógica

Persistencia

Feature

Smart Containers, Dumb Presenters,

Services, Resolvers

Repositories

Shared

Atomic-Components, Directives, Pipes

Validators, Guards, Global Utilities

Interceptors, Store, Router

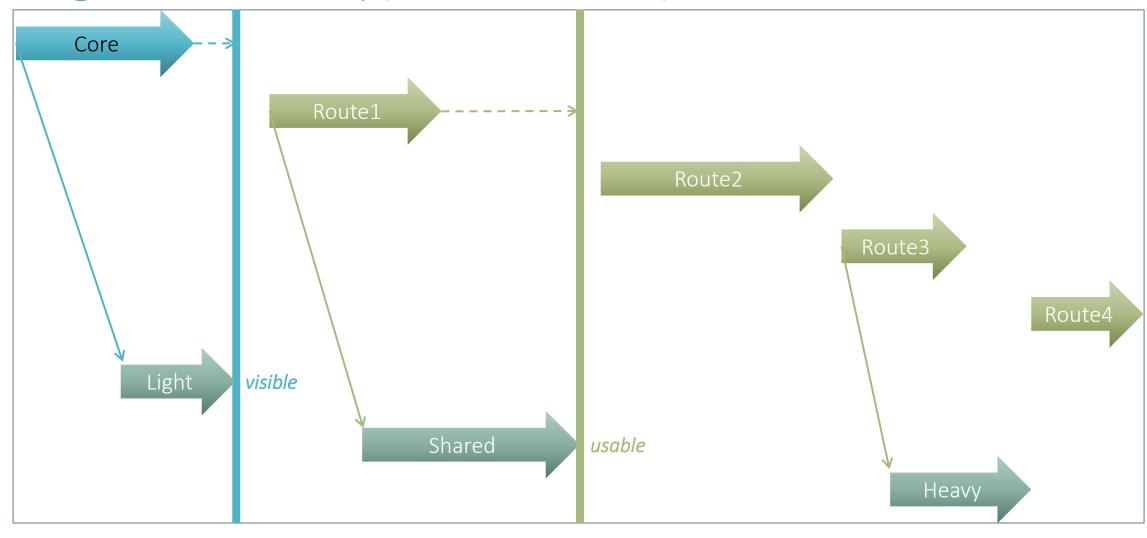

Módulos: C.Ro.S.

Core: Infraestructura del Framework

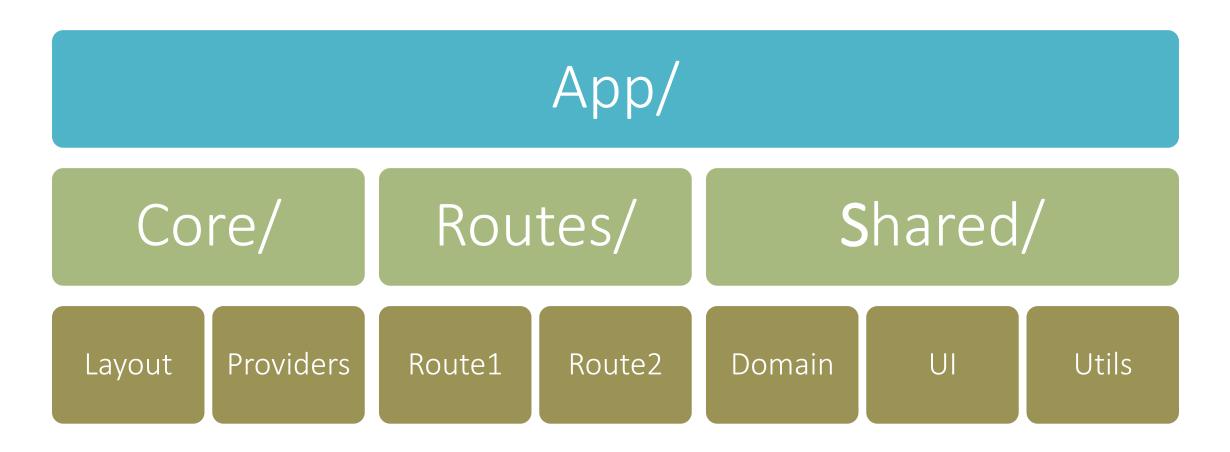

Routes: Funcionalidad específica

Shared: Utilidades comunes

Time-Line Eager-Main->Lazy(route+shared)

CRoS: Folder Modules

Escalado

SCAM: Single Component Angular Module

Multi Project: App + Libs

Clean architectures: Domain + Details

Micro Front Ends: Shell + Web Components, Federation..
